

Milling Cool MC 200 Fanuc RD-A

Coolant ring with 4 programmable nozzles for

FANUC ROBODRILL a-DIB Plus Serie

FANUC

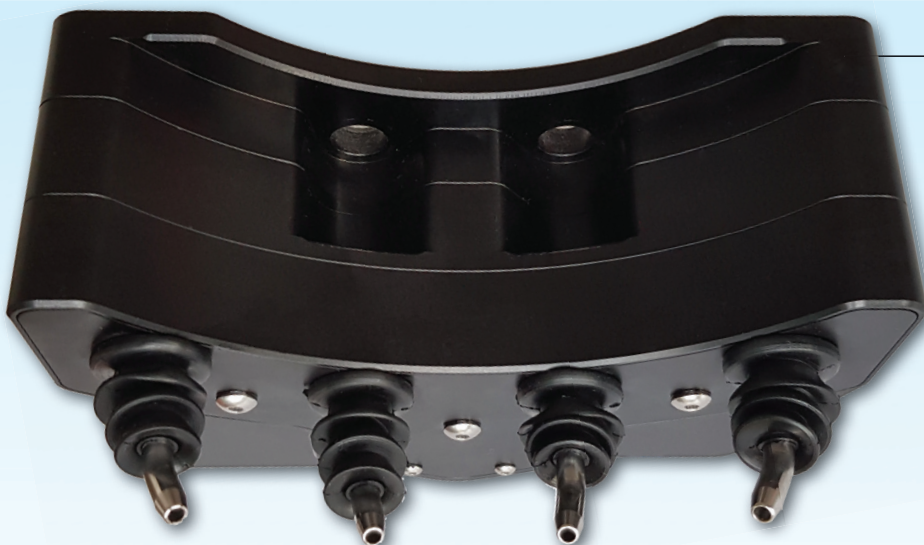

OUR PRODUCT

- Coolant ring with 4 programmable and continuously adjustable nozzles
- Operation through the FANUC machine controls
- Automatic nozzle adjustment according to tool length
- Easy installation
- Plug & Play

YOUR ADVANTAGES

- No risk of injury during machine operation
- Adjustable without stopping of the machine
- Improved flush out during pocket milling and drilling
- Rapid nozzle adjustment speed
- Higher tool lives
- Lower coolant consumption through targeted circular flushing
- Optimal coolant supply to the milling toolpath and cutter shadowed area
- Integrated controls in the coolant ring

Model:

MC 200 FANUC RD-A
